

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Hic ipse autem fortior & crassior est, quam in homine, & exterius atque inferius humeri latus occupat.

Inter flexores cubiti biceps ejusdem est structuræ uti in homine.

Brachialis verò interni origo sese protendit ad capitulum usque humeri, & in suo progressu hic musculus totam humeri externam partem veluti fasciatim ambit, & eodem loco uti in homine inferitur.

Flexores carpi adsunt tres ; Extensores carpi tales sunt, quales in homine.

Extensores digitorum sunt primò communis, qui in tres digitos priores inferitur ab humero ortus. Secundus cubito descendens, in ultimum & penultimum inferitur.

Adest & indicator s. extensor indicis.

Pronatores se habent uti in homine.

Ex supinatoribus longus brevior est brevi, cæterum ejusdem situs uti in homine.

Aliorum musculorum descriptiones reservamus in aliud tempus.

Figurarum Explicatio.
